

Map 2 – Angarrack - Hayle

Reasoning

To take properties that currently lie within GGP but either associate with Angarrack or relate to the area out of GGP and into HP.

Logic

Two properties that currently lie within GGP are on the edge of the village of Angarrack which currently lies predominantly within HP. The two properties cannot enter GGP without going through HP.

Features

The current border here uses field systems and a similar approach has been used.

Number of dwellings

Two

Plus or Minus to GGP

Minus

Implications

- The Council Tax for these properties would be increased by around £99 p.a.
- The only additional feature or asset within this area is half of one small PROW (101/20/1) requiring 2 cuts per year currently within GGP. It is not unusual for PROW's to run from one Parish to another.
- There would be no change to the Cornwall Council division due to this change.
- There would be a change to the Neighbourhood Plan boundaries for both Parishes.
